

Create your own

Snowflake Ballerina

Step 1: Cut out this ballerina. You can trace her onto construction paper or cardstock paper too. Color her in if you like!

Step 2: Begin making the snowflake. Fold a square of white paper so you create 12 triangle segments. Check out a YouTube video on how to do this tricky part.

(Search Ballerina Snowflake)

Step 3: Cut out the snowflake template and then the gray areas. Place the template so the fold line of your folded square matches the dotted line of the template. Trace the design with pencil.

Step 4: Cut out the gray areas as shown. Unfold your beautiful snowflake!

Step 5: Gently pull your ballerina's head and arms through the snowflake center. Tape a thread to her and hang her in the air, or tape her to a window, so she can dance!

Step 6: Create more!
